REAL-TIME DATA

### When the city becomes alive

Every bench, every shelter, every station becomes a sensor.  
Every data point becomes a decision — for cities that are safer, cleaner, more human.

#### The technology

- ▶ Solar-powered street furniture — benches, shelters, stations, bins
- ▶ InCity platform — real-time monitoring and analytics
- ▶ Environmental sensors — air quality, noise, weather
- ▶ AI mobility module — pedestrian, cyclist, vehicle counting

#### The benefits

- ▶ Zero grid connection — fast deployment anywhere
- ▶ Actionable urban data for public decision-makers
- ▶ Built-in Wi-Fi, USB charging and citizen comfort
- ▶ GDPR-compliant — IK09 / IP55 / CE certified design
